

1. Comment Section**What is this instructor doing that helps you learn in his/her class?**

- He encourages people to speak what they feel on the topic we are on which created more ideas for the class as a whole
- Mr. Dixon was very thorough and answered all questions., his class had me asking myself alot of questions concerning my ethics and morals and why i think the way I do
- He explains thing over and over agin until you personally understand it. That is a great quality.
- He did a lot of notes on the board and explained everything very clearly with a good amount of visual aids! Very helpful!
- I really liked that he gave a review of the previous class lesson before he started new topics
- The instructor thoroughly breaks down and simplifies the readings that are required. The teacher explains key/major points and helps make the confusing things much easier.
- He makes sure all of his students understand the topic before continuing with the lesson. He is very patient and very knowledgeable.
- Alot about ethics understood everything.
- He went over previous readings and made sure we understood the lesson before moving on
- Professor Dixon explains the material very well and makes sure to give examples for everything. He also provided visuals to help understand the material.

What could the instructor do to create a more positive learning environment for students?

- I suppose use actual photographs
- He used examples and that made the class easier for myself to get the understanding,he also answered and asked questions He wanted to make sure the class was getting an understanding
- He did almost everything possible with the allotted time.
- In all honesty he did great on just about every aspect of the class! The only thing is I would say to not let the class run long.
- The instructor has already created a very effective positive learning environment, and I believe no modification needs to be made on how the teacher is teaching the class.
- Nothing it was perfect the way it is. Everything was perfect.
- Let the students state their opinions more. We understand the author's point of view that we had to read about but sometimes as a student we disagree and it would have been nice to express ourselves more in certain topics
- I felt that the learning environment was positive and there is little room for improvement.

Additional Comments:

- I've had him before, and he was still great!
- Mr. Dixon class was very interesting and different I enjoyed him as my professor very much I would like to take my philosophy class in the fall with him if he teaches it.
- This was a great class. i really came out thinking on a different level than before. I would refer him to anyone.
- Now i know why in Ursula Le Guin's "The Ones who walk away from Omelas" the people were wrong.
- The instructor is very outstanding and his character and teaching methods have made me appreciative of Ethics and motivated me to do more independent studying on this subject as well as take other classes involving Philosophy/Ethics. The teacher did a wonderful job in getting students introduced to the subject, and I will definitely retain what was taught to me from the first day of class to the last.
- I really enjoyed Mr. Dixon's class. He is a great teacher.
- Thanks for the class if i can take another class with you i will.
- Professor Dixon was an excellent teacher. He explained the material very well and made sure that it was understood by the whole class. He kept the class updated for the upcoming days. He made the class entertaining even though the lessons were dull. The class was open for discussion. I would highly recommend Professor Dixon for other students.
